Watchguard™

Model: WREEDI

Wireless Indoor Reed Switch

Supervised Universal Transmitter

Designed to help provide additional security and detection methods, the WREEDI is a high-quality wireless reed switch, compatible with the range of Watchguard Wireless Alarm Systems. The magnetic reed switch is designed to monitor home access points such as doors and windows, which may be used to gain illegal entry to a property.

If contact is broken between the two switches when the alarm is armed (i.e if a door is opened), then the switch will trigger and activate the alarm. The reed switch also features built-in terminals which allow it to be used as a universal transmitter

Features

- Wireless Reed Switch for doors or windows,
- Built-in option to use as a universal transmitter
- Up to 5 years lifespan from 2 x CR2450 lithium batteries
- Microprocessor controlled
- Tamper protected case (top and bottom)
- Sends alarm, supervision, tamper & low battery
