

Analog 4-Wire Video Intercom

Quick Start Guide

Foreword

General

This manual mainly introduces structure, installation, wiring and menu operations of the analog 4-wire video intercom. Read carefully before using the device, and keep the manual safe for future reference.

Model

7-inch and 4.3-inch VTH

Safety Instructions

The following categorized signal words with defined meaning might appear in the manual.

Signal Words	Meaning
 DANGER	Indicates a high potential hazard which, if not avoided, will result in death or serious injury.
 WARNING	Indicates a medium or low potential hazard which, if not avoided, could result in slight or moderate injury.
 CAUTION	Indicates a potential risk which, if not avoided, could result in property damage, data loss, reductions in performance, or unpredictable results.
 TIPS	Provides methods to help you solve a problem or save time.
 NOTE	Provides additional information as a supplement to the text.

Revision History

Version	Revision Content	Release Time
V1.2.3	Revised wiring description.	November 2022
V1.2.2	Revised wire color description.	January 2022
V1.2.1	Added the recommended installation height of the device.	January 2022
V1.2.0	Added new model 4.3-inch VTH.	October 2021
V1.1.0	<ul style="list-style-type: none">Added description of the functions of 7-inch VTH.Added Factory Reset function.	March 2021
V1.0.0	First release.	August 2020

Privacy Protection Notice

As the device user or data controller, you might collect the personal data of others such as their face, fingerprints, and license plate number. You need to be in compliance with your local privacy protection

laws and regulations to protect the legitimate rights and interests of other people by implementing measures which include but are not limited: Providing clear and visible identification to inform people of the existence of the surveillance area and provide required contact information.

About the Manual

- The manual is for reference only. Slight differences might be found between the manual and the product.
- We are not liable for losses incurred due to operating the product in ways that are not in compliance with the manual.
- The manual will be updated according to the latest laws and regulations of related jurisdictions. For detailed information, see the paper user's manual, use our CD-ROM, scan the QR code or visit our official website. The manual is for reference only. Slight differences might be found between the electronic version and the paper version.
- All designs and software are subject to change without prior written notice. Product updates might result in some differences appearing between the actual product and the manual. Please contact customer service for the latest program and supplementary documentation.
- There might be errors in the print or deviations in the description of the functions, operations and technical data. If there is any doubt or dispute, we reserve the right of final explanation.
- Upgrade the reader software or try other mainstream reader software if the manual (in PDF format) cannot be opened.
- All trademarks, registered trademarks and company names in the manual are properties of their respective owners.
- Please visit our website, contact the supplier or customer service if any problems occur while using the device.
- If there is any uncertainty or controversy, we reserve the right of final explanation.

Important Safeguards and Warnings

This section introduces content covering the proper handling of the device, hazard prevention, and prevention of property damage. Read carefully before using the device, comply with the guidelines when using it.

Operation Requirements

- Check whether the power supply is correct before use.
- Do not unplug the power cord on the side of the device while the adapter is powered on.
- Operate the device within the rated range of power input and output.
- Transport, use and store the device under allowed humidity and temperature conditions.
- Do not drop or splash liquid onto the device, and make sure that there is no object filled with liquid on the device to prevent liquid from flowing into it.
- Do not disassemble the device without professional instruction.

Installation Requirements

WARNING

- Do not connect the power adapter to the device while the adapter is powered on.
- Strictly comply with the local electric safety code and standards. Make sure the ambient voltage is stable and meets the power supply requirements of the device.
- Do not connect the device to two or more kinds of power supplies, to avoid damage to the device.
- Improper use of the battery might result in a fire or explosion.

- Personnel working at heights must take all necessary measures to ensure personal safety including wearing a helmet and safety belts.
- Do not place the device in a place exposed to sunlight or near heat sources.
- Keep the device away from dampness, dust, and soot.
- Install the device on a stable surface to prevent it from falling.
- Install the device in a well-ventilated place, and do not block its ventilation.
- Use an adapter or cabinet power supply provided by the manufacturer.
- Use the power cords that are recommended for the region and conform to the rated power specifications.
- The power supply must conform to the requirements of ES1 in IEC 62368-1 standard and be no higher than PS2. Please note that the power supply requirements are subject to the device label.
- The device is a class I electrical appliance. Make sure that the power supply of the device is connected to a power socket with protective earthing.

1 Structure

1.1 Introduction

The analog 4-wire video intercom consists of a door station ("VTO") and an indoor monitor ("VTH"). It is applicable to buildings, such as residential buildings, for people to do voice and video calls. The VTO is installed outdoors and VTH is installed indoors.

1.2 Features

VTH

- Real-time video/voice communication
- Can be connected to three VTOs
- Can be connected to cameras (CVBS)
- Plug-and-play

VTO

- Real-time voice communication
- Self-adaptive IR illumination

1.3 Front Panel

2		<ul style="list-style-type: none"> ● Press to hang up the incoming call. ● Take snapshots during monitoring (only supported by VTH1020J-T).
3		<p>Wake up the screen, and bring up the menu.</p>  <p>For how to operate the menu, see "4 Menu Operations".</p>
4		<p>When someone is calling from the VTO:</p> <ul style="list-style-type: none"> ● Press once to do voice communication with the person. ● Press twice quickly to hang up.
5		<p>When someone is calling from the VTO:</p> <ul style="list-style-type: none"> ● Press to talk to the person (only supported by VTH1020J). ● Press to take snapshots (only supported by VTH1020J-T). <p>When no one is calling:</p> <ul style="list-style-type: none"> ● Press once, twice, three times and four times to view live video of: VTO1, VTO2, analog camera 1 and analog camera 2 respectively. ● On any live video, press to take snapshots (only supported by VTH1020J-T).
6		When someone is calling, press to open the door where the VTO is installed.
7	–	Power indicator.
8	–	LCD screen.
9	–	Microphone.
10	–	Built-in camera.
11	–	Power indicator.
12	–	<p>Call button.</p> <ul style="list-style-type: none"> ● Press once to call the VTH. ● Press and hold for 10 seconds to change the bell type of the VTO. The power indicator will flash. ● Press and hold for 15 seconds to turn up the bell volume of the VTO. The power indicator will flash. When the volume reaches maximum, this step will set it to minimum. Repeat this step to set appropriate volume. ● Press and hold for 20 seconds to change to DWDR (digital wide dynamic range)/normal mode for the VTO. The power indicator will flash.
13	–	Speaker.

1.4 Rear Panel

There might be slight differences in the rear panel among different models. But they have the same function ports.

Figure 1-3 Rear panel

Table 1-2 Rear panel

No.	Description	No.	Description

2 Installation

- Do not install devices in harsh environment with condensation, high temperature, dust, corrosive substance and direct sunlight.
- In case of abnormality after powering on the device, cut off the power supply at once, and unplug the network cable. Power on after troubleshooting.
- Installation should be done by professional teams. Do not dismantle or repair the device by yourself in case of device failure. Contact after-sales service if you need any help.
- The recommended installation height of the device is 1.6 m from the ground.

Figure 2-1 Installation height

2.1 VTH

Fix the bracket on the wall by screws, hang the VTH on the bracket, and then apply silicone sealant to the gap between the device and the wall.

Figure 2-2 VTH installation

2.2 VTO

Install the VTO bracket on the wall, and then hang the VTO on the bracket; or install the VTO cover on the wall, and then hang the VTO on the cover. Finally, apply silicone sealant to the gap between the device and the wall.

Figure 2-3 VTO installation

Figure 2-4 Apply silicone sealant to the gap between the device and the wall

3 Wiring

At most 2 VTOs and 3 VTHs can be wired in one communication system.

3.1 Preparations

3.1.1 Port Connection Rules

Figure 3-1 Port connection rules

- Port A of an VTH can be connected to Port C of another VTH to do data communication.
- Port B of an VTH can be connected to Port D of another VTH to do data communication.
- Port A of an VTH cannot be connected to Port B or D of another VTH to do data communication.
- Port C of an VTH cannot be connected to Port B or D of another VTH to do data communication.

3.1.2 Cord Specification

Depending on the distance between the VTO and VTH, you need to select RVV4 cords of different specifications.

Table 3-1 Cord specification

Transmission Distance (TD)	RVV4 Cord Specification
$TD \leq 10 \text{ m}$	$RVV4 \times 0.3 \text{ mm}^2$
$10 \text{ m} < TD \leq 30 \text{ m}$	$RVV4 \times 0.5 \text{ mm}^2$
$30 \text{ m} < TD \leq 50 \text{ m}$	$RVV4 \times 0.75 \text{ mm}^2$

If the distance between the VTO and VTH is more than 50 m, use coaxial cables.

- Do not pull the cords violently.
- During wiring, wrap the cord joints with insulated rubber tape to prevent short circuit.

3.2 Wiring One VTO and One VTH

Figure 3-2 Wiring (1)

3.3 Wiring One VTO and Three VTHs

Figure 3-3 Wiring (2)

3.4 Wiring Two VTOs and Three VTHs

Figure 3-4 Wiring (3)

The recommended analog cameras (CVBS) are HAC 1230 series.

4 Menu Operations

You can configure the functions of the VTH, such as volume, brightness, and more.

- Only VTH1020J-T supports the **Snapshots** and **Time** functions.
- All configurations will be saved after you exit the menu.

Figure 4-1 Menu

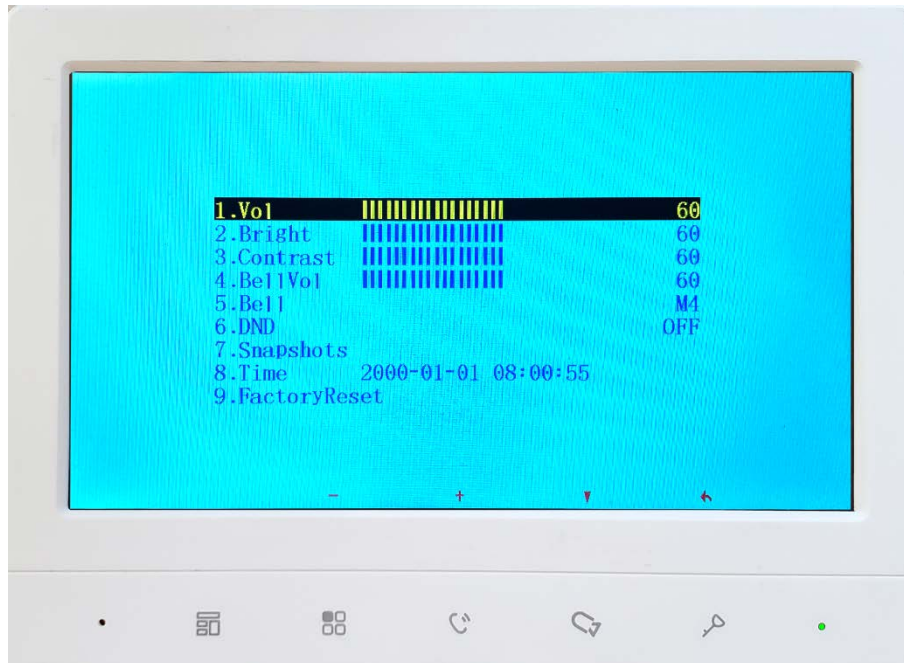

Table 4-1 Menu operations

Icon	Function
	Used to confirm your operation when you are using the Snapshots and Time functions (only supported by VTH1020J-T).
	Adjust Vol (volume), Bright (brightness), Contrast and BellVol (bell volume), change Bell and turn off DND (do not disturb).
	Turn up Vol (volume), Bright (brightness), Contrast and BellVol (bell volume), change Bell , turn off DND (do not disturb), and adjust the time.
	Select an item.
	<ul style="list-style-type: none">• Exit the menu and lock the screen.• Go back to the previous interface.

4.1 Snapshots

You can take snapshots during monitoring, and view the snapshots you have taken.

The VTH can store up to 200 snapshots. If storage is full, the earlier ones will be overwritten.

Taking Snapshots

- During monitoring.

Step 1 Press  to go to the monitoring image that you want.

Step 2 Press , and then **Successful** will appear on the screen.

- When a VTO is calling or in a call with a VTO, press , and then **Successful** will appear on the screen.

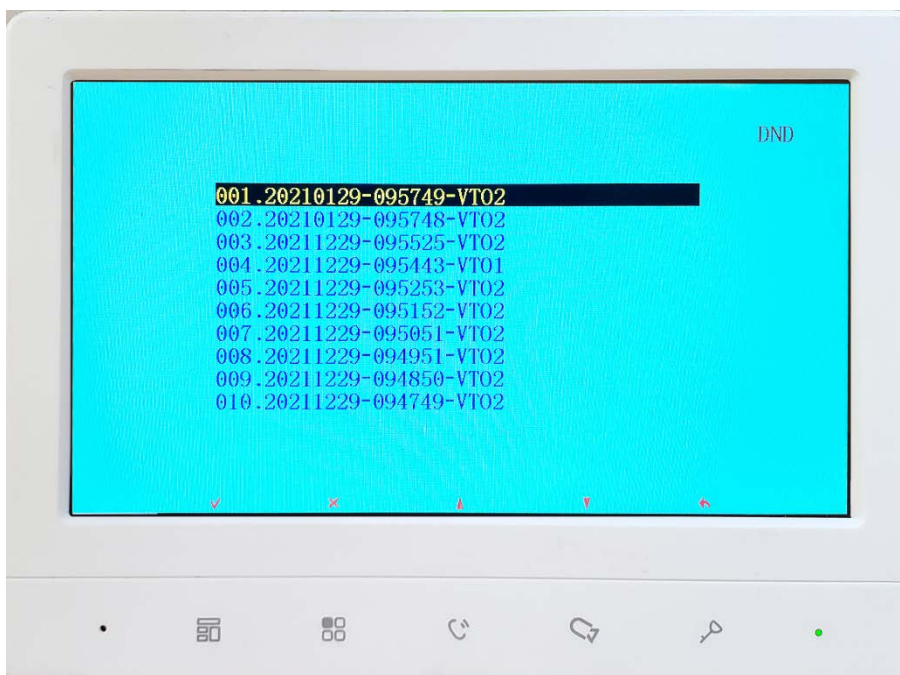

If the calling lasts more than 1 second, a snapshot will be automatically taken.

Viewing Snapshots

Step 1 Press  to bring up the menu.

Step 2 Press , select **Snapshots**, and then press .

Figure 4-2 List of snapshots

Step 3 Press  to select the one that you need, and then press .

To delete a snapshot, press , **Delete?** will appear on the screen, and then press  to confirm.

Figure 4-3 Viewing a snapshot

Step 4 Press  or  to view the previous or next snapshot. Or you can press  to go back to the list of snapshots, and then select the one that you need.

To delete a snapshot, press , **Delete?** will appear on the screen, and then press  to confirm.

4.2 Time

Step 1 Press  to bring up the menu.

Step 2 Press  to select the part of the time that you want.

Step 3 Press  to or  to adjust the number.

4.3 Restoring to Default Settings

Step 1 Press  to bring up the menu.

Step 2 Press  to select **FactoryReset**.

Figure 4-4 Confirm your operation

Step 3 Press , and then the device will restart.
