

Metal Back Box — Large Plate

Chrome-Plated Zinc Alloy Surface-Mount Enclosure for X2 Large Plates

SURFACE-MOUNT MOUNTING ACCESSORY

Overview

Chrome-plated zinc alloy back box, dimensioned for the X2 large 115 × 70 mm plate footprint. Use when you cannot recess the exit-button plate into a wall cavity — brick, render, glass-block, painted concrete, or solid timber. Internal depth comfortably accepts 4-core security cable and the X2 button's rear screw-terminal block.

The X2-EXIT-016 is a passive mounting accessory only — no electronics, no voltage, no internal wiring. An X2 large-plate exit button is sold separately.

Technical specification

Reference	X2-EXIT-016
Manufacturer P/N	X2-EXIT-016
Product class	Surface-mount metal back box
External dimensions	115 × 70 × 25 mm

IP rating	Indoor — not IP rated
Includes electronics	No — passive mounting accessory only
Country of manufacture	China
Warranty	12 months manufacturer warranty
Supplied by	Infront Technologies — Australia-wide

Wiring & installation notes

- No electrical connections — this is an empty mounting enclosure.
- The X2 exit button mounts into the front face; cable for the button is run through the centre rear knockout.
- Mark the four corner holes through the back box, drill, fix with wall plugs / screws sized to your wall substrate.

INSTALLATION & SAFETY NOTICE

Passive mechanical accessory. The X2-EXIT-016 is an empty metal back box — no electronics, no mains wiring, no voltage of any kind. Wall fixings must be sized to the building substrate; concealed security cabling fed into the box is customer cabling under AS/CA S009 and must be installed by an ACMA-registered cabler. Specifications supplied in good faith — verify against the latest manufacturer documentation before ordering.
