

NEW Release

Rhino[®] NEW Generation! Rhino RAV3 Car Alarm

Here at Rhino we've been working on the new generation of Car Alarms for the past 8 months. We haven't just taken an off-the-shelf product and tweaked it a little bit. What we've done is listen to you and we've thrown in a few ideas of our own. It's taken a bit of time, but Rhino is proud to introduce you to a new generation of car alarms. The RAV3 is a top quality car alarm which has been engineered to the highest specifications, to ensure you get the ultimate in car security. It is packed with extra features including factory key operation and much more.

Alarm features:

Three automatic immobilisers

For maximum security fuel pump, ignition system and starter motor immobiliser cuts (where possible) are made so the car cannot be started unless it is disarmed via the remote. The system will immobilise 40 seconds after the ignition is turned off or when the alarm is armed.

Intelligent glass break sensor

Detects the sound frequency of breaking glass. It will only trigger the alarm if the shock sensor also picks up an impact. This reduces false alarms.

Intelligent dual stage shock sensor

It gives a warning on a light impact and a full alarm on a heavy impact to the vehicle. It can distinguish between environmental shocks such as trucks or aircraft and a thief attempting to break in. It will auto adjust its sensitivity for the environment on arming.

Data battery back-up siren

A self powered siren that communicates independently with the alarm so it cannot be fooled into turning off like normal battery back-up sirens.

Door, bonnet and boot protection

If the alarm is armed and a door, bonnet or boot is opened the alarm will sound.

Central locking from the remote*

The alarm will lock/unlock the doors when the alarm is armed/disarmed.

Two rolling code 4 button waterproof remotes

(If you are not using your car's factory key to operate the alarm).

Turbo timer functions*

The RAV3 is designed specifically to work with turbo vehicles. It has two turbo timer options to choose from.

On-board turbo timer - no need to fit an external unit - using the on-board turbo timer is the most secure way to have a turbo timer. The alarm is armed as usual but the car will continue to run for the preset run time of 1, 2 or 4 minutes. If the alarm is triggered during this time the car will shut down and the alarm will sound. It can also be turned off prior to the preset run time via the remote.

Turbo timer interface - link the alarm up with your existing external turbo timer so your car will continue to run on the external turbo timer after the alarm is armed as usual. If the alarm is triggered during this time the car will shut down and the alarm will sound.

NEW Control the alarm with your vehicle's factory key*

If your vehicle has a factory key that locks/unlocks the doors your RAV3 alarm may be able to interface with it so the alarm arms/disarms at the same time. Boot release will also work from the factory key (and if the alarm is armed it will disarm). This feature will work with most factory keys.

NEW Courier function*

Courier function allows the engine to continue running indefinitely while the system is armed. If the alarm is triggered during this time the car will shut down and the alarm will sound.

Hyper blue LED warning light

Compatible with all Rhino car alarm accessories and sensors

Three year warranty

Also available in a 24-volt version
