RhinoCo Technology RCX-4

Wire connections as follows:

Power:

Negative - Black
+12V - Red

Two second negative pulsed output:

Channel 1 - Yellow
Channel 2 - Green
Channel 3 - Brown
Channel 4 - Orange

Momentary negative output:

Channel 1 - White
Channel 2 - Blue

Learning new remotes:

To learn new remotes, hold down buttons 1 and 3 on an existing remote for 5 seconds, or until the internal red LED begins to flash. Immediately release the existing remote and press any button on the new remote for 3 seconds, your remote should now be learnt in.

If you are unable to find lost remotes you should have the system sent back to the Rhino Service Department for resetting. This is important to ensure that no unauthorised entry can occur from someone using the lost remote control(s).

Wiring loom orientation:
