Heavy Duty Wireless Reversing Camera / Recorder Kit

Model: MSKIT-WRC

The lack of vision behind large and heavy vehicles can make reversing a dangerous activity. Side mirrors alone are sometimes not enough to judge depth when negotiating a loading dock. The Rhino™ MSKIT-WRC wireless system helps to make this process easier and safer, and being wireless it is easy to install.

Product Features:

- 2.4GHz 420TVL Wireless Reversing Cam Kit
- 7" digital LCD monitor
- Monitor and camera connect automatically for easy installation
- 2.4G frequency with a transmission distance of up to 12m
- 12V/24V power supply
- 2 video channels for additional camera support

Camera Features:

- 420 TVL resolution
- Fixed 2.8mm lens for wide 120° field of view
- LEDs for night vision 30m infrared
- IP67 weather resistant
